

For our **IT department** we are looking for a

IT Administrator / IT Specialist for System Integration (m/f/d)

What we are offering

- A challenging task in a dynamic, growing team
- Being a part of a **world-leading cutting-edge technology** going to market
- High chances for personal development
- Flat hierarchies
- **Part-time models or flexible** working hours ensure a good work-life balance
- Above average payment

Expect these tasks:

- Collaboration in **exciting IT projects**
- Development and expansion of existing infrastructures
- Close cooperation with the development team
- Installation, configuration and commissioning of (virtual) servers and software
- Administration of user accounts and access rights
- 1st and 2nd level support tasks including monitoring and troubleshooting

What you should provide

- Successfully completed trainee program as an IT specialist (m/f/d) in the field of system integration or application development, comparable training or previous professional experience
- **Advantageous:** Experience with Windows, Linux and Docker, as well as cloud affinity
- High communication and cooperation skills
- Personal responsibility, initiative and willingness to learn

As an innovative, medium-sized start-up, we develop plant propagation systems. With **holistic, autonomous, AI and deep-learning controlled, automated production systems**, we set the industry standard in the global agricultural and horticultural industry. Join us in shaping a livable future with our **award-winning world's first "RoBo®Cut"**. This innovative environmental technology empowers our customers to achieve **highly efficient and sustainable local production**.
